

INVITATION for groundbreaking

Dear partners, stakeholders, customers, colleagues and friends

A little less than a year ago **Blue World Technologies** was founded with an aim to make a difference in the world by providing a real green alternative to the combustion engine. Now, the time has come to start the construction of the world's largest methanol fuel cell factory at the Port of Aalborg. We, therefore, welcome you to come and join us for the celebration of the groundbreaking.

The groundbreaking will be initiated by the founders of Blue World Technologies together with the Mayor of Aalborg, Thomas Kastrup-Larsen, the CEO of Methanol Institute, Gregory Dolan as well as other close partners.

When: Tuesday 17 September 2019 from 14:00 to 16:30

Where: The groundbreaking ceremony will take place at the location of the methanol fuel cell factory to-be, Vulkanvej, 9220 Aalborg Øst
After the ceremony, all are invited to join the reception at Langerak 15, 9220 Aalborg Øst

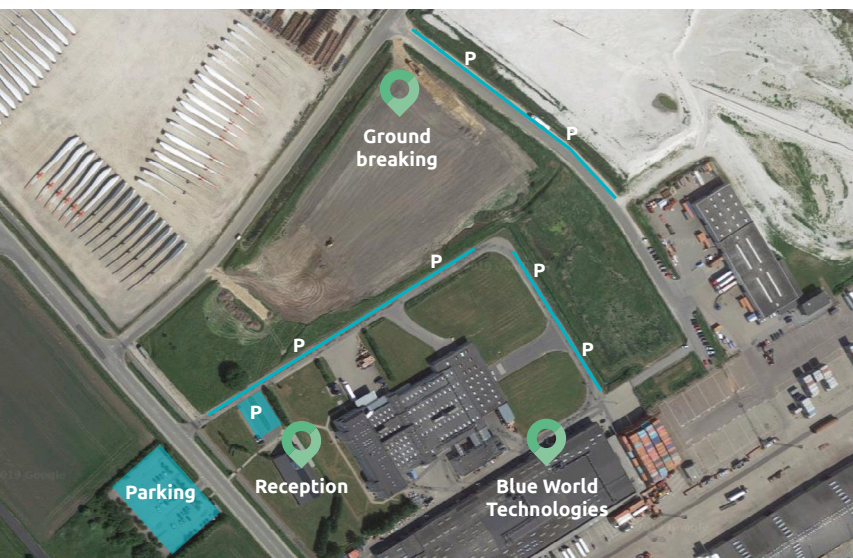

RSVP at your earliest convenience, but no later than 12 September via event@blue.world

We look forward to seeing you!

Best regards

Blue World Technologies

Anders Korsgaard, Mads Bang and Mads Friis Jensen

Blue World Technologies is an advanced developer and manufacturer of methanol fuel cell components and systems as a real green alternative to the combustion engine. Our methanol fuel cell systems are designed and developed for various applications.

With decades of accumulated experience in the industry, our focus is on developing an advanced technology portfolio ranging from core materials, stack and reformer design to the final reformed methanol fuel cell system.
